## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-4 and 6-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance for this claim is the inclusion of the limitations of a printhead module for a printhead assembly comprising a plurality fluid distribution members, each incorporating a laminated stack of layers, each layer having apertures for distributing the printing fluid from a support member to associated printhead integrated circuits, the apertures of each layer from the support member to the associated printhead integrated circuit being of successively smaller diameter. It is these limitations in combination as claimed that have not been taught, found, or suggested by prior art.

The rest of the claims are allowable due to their dependency on base claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Silverbrook et al. (US patent 6,409,323) discloses a laminated ink distribution structure for a printhead that has a number of layers adhered to one another. Each ink hole has communication therewith a channel formed in one side of the layer and allowing passage of ink. The laminated structure distributes the different inks to an array of print chips of a color printer.
